## **CSI OH&S Signage**

#### CSI OH&S signage assists in keeping your workplace secure and industry safety compliant.

In this brochure, we present our standard stock selection. If you are looking for a sign not featured in this brochure our design department will design it to your specifications. Following Australian Standards AS 1319-1994 specific parameters, all signs are available in a range of sizes and four material types:

#### Alupanel

The most durable signage material, Alupanel is recommended for outdoor and indoor use. These composite signs are manufactured by layering polypropylene between two sheets of powder coated steel. Also used for two sided suspended signage. Can be supplied with or without four corner mounting holes.

#### Signwhite Metal

Spray painted one side steel sheet for outdoor and indoor use. Can be supplied with or without four corner mounting holes. Signwhite Metal is also used for one sided street signs.

#### Corflute

Lightweight and low cost, these signs are suitable for indoor display (or outdoor temporary environments such as building sites). They are flexible and can be mounted on slightly curved surfaces.

#### Self Adhesive Vinyl

Can be adhered to practically any clean, dry surface. Suited to curved surfaces or mounting on glass, metals or plastics, just peel off the backing paper and quickly apply.

#### **Sign Sizes**

You will see our standard sizes under each sign category and on the price guide. However, if you require any of our signs scaled to a size not listed, we can fulfill your order up to a size of 900mm x 1200mm.

#### **Polypropylene Floor Stand Signs**

Any of our signs can be printed onto a sturdy, water resistant polypropylene A-frame free standing floor sign. Folds away for easy storage and is especially relevant to sign titles relating to cleaning, slippery surfaces and temporary entry restrictions. See the price guide for details.

#### **Price Guide and Order Form**

Refer to the enclosed price guide and fax order form. This form features costs for each sign size and material choice. Remember to specify CSI product code number, size, quantity and sign material type when ordering.
